1 Background

The Bemis-Murcko sca□old[1] provided by DataWarrior[2]

```
$ saturate_murcko_scaffolds test.smi
C1CCNCC1
C1CCCCC1
```

In a mixed input queue, SMILES strings provided via the CLI are processed prior to SMILES

4 Larger example

for a more extensive survey (e.g., the sca□old of cyclophane [entry #33], sparteine [#38], or adamantane [#50]).

5 Known peculiarities

The script provides «saturation» by dropping explicit information related to double and triple bonds which SMILES encode (=, # regarding bond order; /
